

## REM-SOLAR

### Compact support for Photovoltaic systems

#### SYSTEM DESCRIPTION

**REMSOLAR** systems allow to have in a single pre-assembled system a production and energy storage facility for power feeding surveillance systems, remote control, supervision or lighting to be mounted on standard poles. Systems are supplied with:

1. Support frame for the panels.
2. Support frame for the control cabinet.
3. Photovoltaic panels (optional).
4. Control cabinet with stabilizer and batteries.

**IMPORTANT! SIZES CAN BE ADJUSTED BASED ON CUSTOMER SPECIFICATION AND NEEDS.**

#### MAIN FEATURES FOR PHOTOVOLTAIC SYSTEMS REMSOLAR

1. CAPACITY: 2 PANELS FULL SIZE (2000X1000 MM EA. APPROX).
2. PEAK POWER: 470 W.
3. PRE-WIRED AND PRE-TESTED SYSTEM.
4. QUICK CONNECTORS FOR EASY ASSEMBLY AND MAINTENANCE.
5. SEALED IP67 CONTROL CABINET.

**Construction material:** \*Stainless Steel AISI304 / \*Stainless Steel AISI316
